

PUERTA PAMETALICA MODELO 23
DOBLE CHAPA, IGNIFUGA
RELLENA CON LANA MINERAL

Corte vertical

A vertical section drawing of a wall and roof assembly. The wall is shown in cross-section with a stippled pattern. The roof is shown in profile above the wall. Dimensions are indicated with arrows: a total height of 2040 for the wall section, a height of 2000 for the main wall section, and a width of 34 for the wall thickness. A break symbol (two parallel diagonal lines) is shown on the right side of the wall section.

- * Línea de puertas con marco de chapa Nº18 y hoja de doble chapa Nº18 rellena con Lana Mineral.

Corte Horizontal

The diagram shows a horizontal cross-section of a window frame assembly. It features a central glass pane with a cross-hatch pattern, held in place by a gasket. The frame is composed of two main parts: a left side labeled 'MARCO PARA PARED STD. 75mm' and a right side labeled 'MARCO PARA PARED DE 15cm. 170mm'. The left side has a height dimension of 75mm. The right side has a height dimension of 170mm. The total width of the assembly is indicated by two dimension lines at the bottom: 900-800-680-595 for the main frame width and 980-880-760-675 for the overall width including the left side. A break symbol (two parallel diagonal lines) is shown in the center of the glass pane.
